

FDM-6600 MIMO(2x2) NLOS Wireless Ethernet & Full Duplex TTL Serial Data Link

Introduction

- FDM-6600 is a wireless transmission product designed by IWAVE based on mature SOC chipset, which supports point to point and point to multi-point. 1 master node supports up to 16 sub-nodes to share 30Mbps bandwidth for 1080P video transmitting.
- FDM-6600 is designed based on TD-LTE wireless communication standard, OFDM and MIMO technologies. It doesn't rely on any carrier's base station.
- Special design for NLOS environment HD video and Control data transmitting.
- Supports TCP/IP/UDP and full duplex TTL data transmission. And the control data transmission is higher priority than network signal.
- It adopts the Automatic frequency hopping technology for anti-interference greatly reduce system power consumption and size of the module.
- Tri-band frequency: 800MHz/1.4GHz/2.4GHz selectable on software.

Core Technology of Digital Transmission Scheme

- Access authentication to prevent illegal access
- Support user-defined encryption
- Band scanning to avoid interference
- In-band frequency hopping reduces interference effects

- OFDMA
- TDD
- 64QAM、16QAM、QPSK

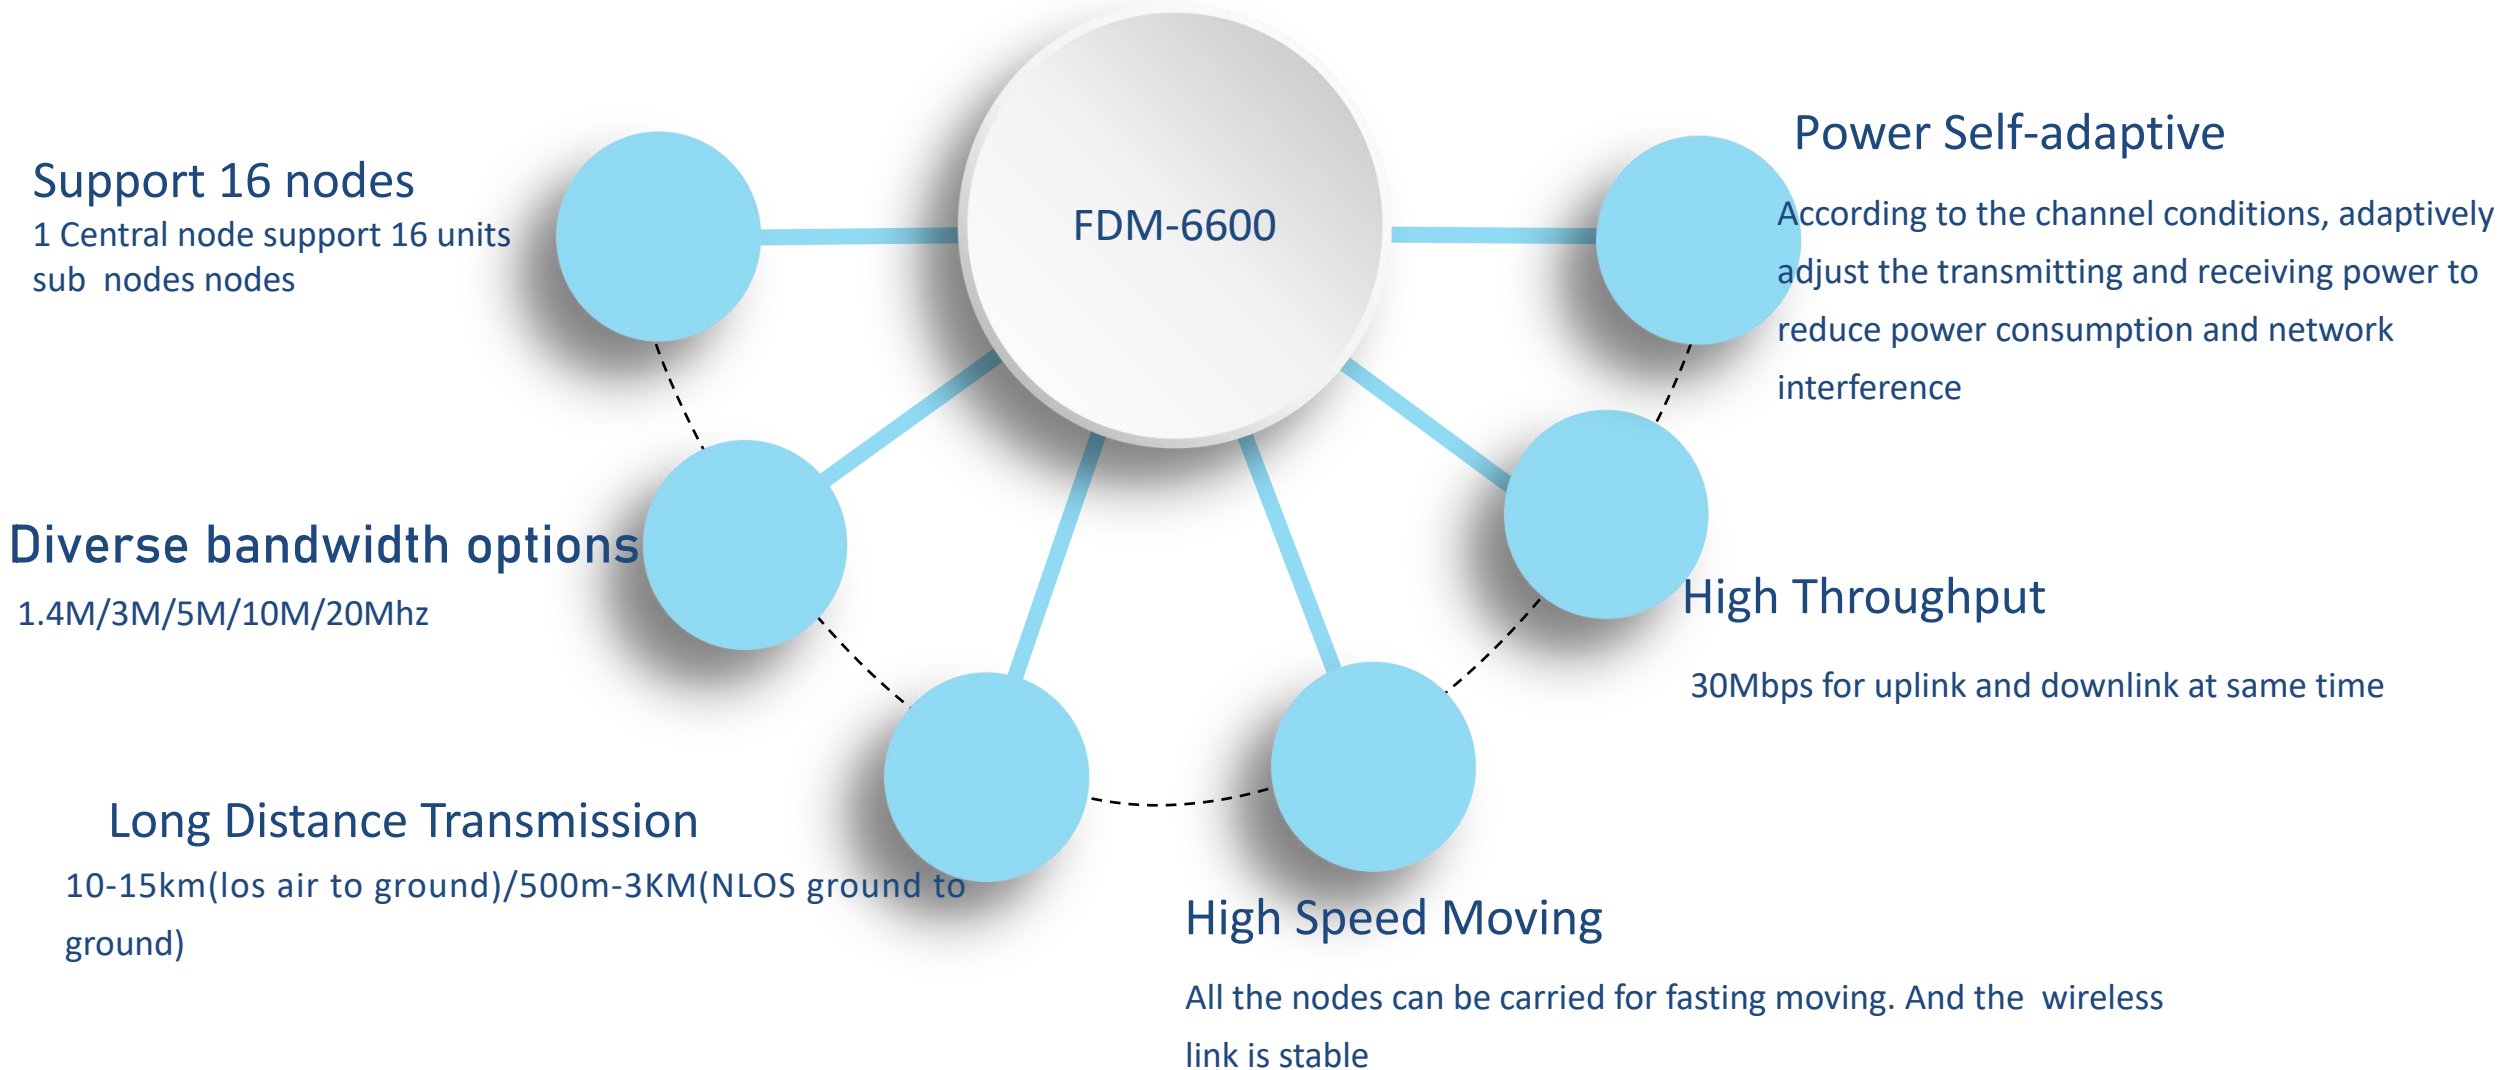

- 800MHz/1.4GHz/2.4Ghz Selective by software
- Bandwidth: 3/5/10/20Mhz
- Support frequency/rf power/appearance customized design
- 23dbm RF Power(Adjustable)
- 30Mbps data rate

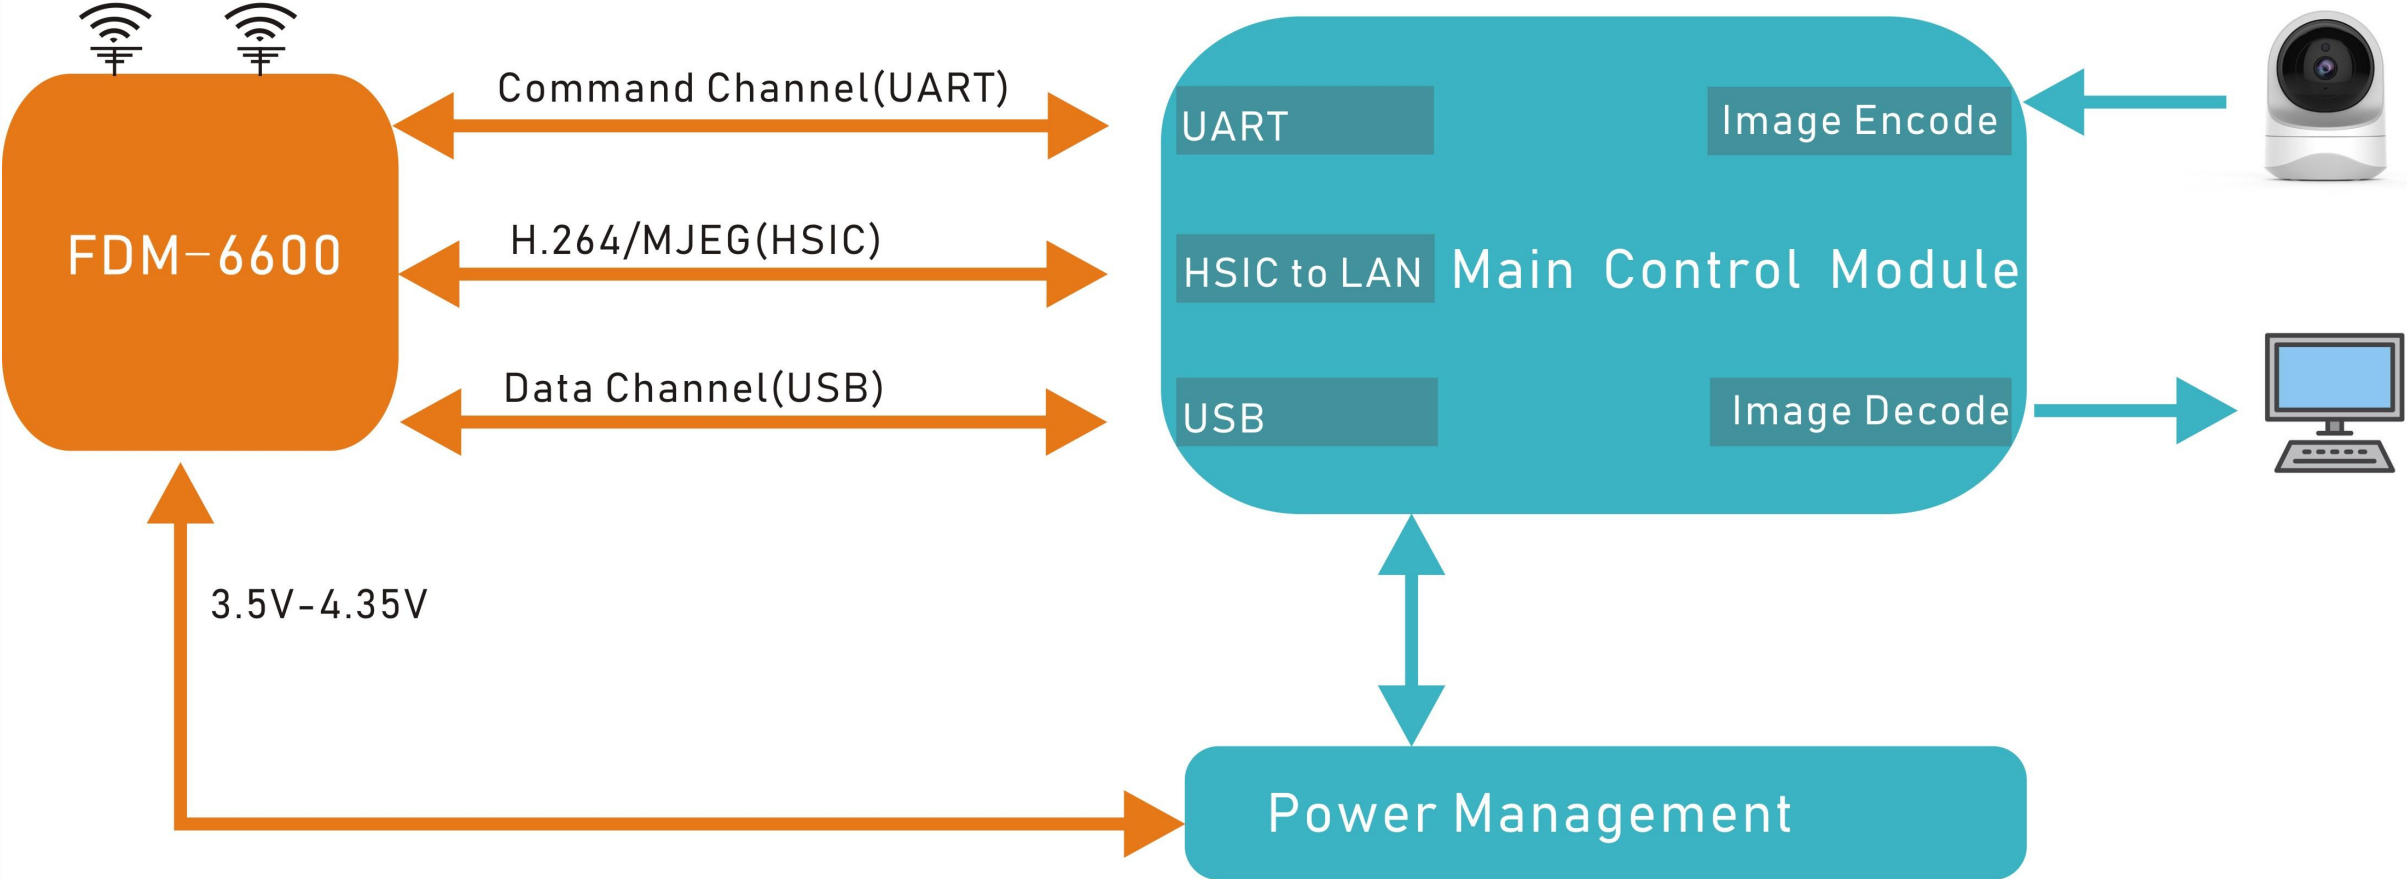

Interfaces

Advantages

Data Flow Diagram of FDM-6600

Technical Specification

GENERAL		SENSITIVITY		
TECHNOLOGY	Wireless based on TD-LTE Technology Standards	2.4GHZ	20MHZ	-99dBm
ENCRYPTION	ZUC/SNOW3G/AES(128/256) Optional Layer-2		10MHZ	-103dBm
DATE RATE	30Mbps(Uplink and Downlink)		5MHZ	-104dBm
RANGE	10km-15km(Air to ground) 500m-3km(NLOS Ground to ground)		3MHZ	-106dBm
PtMP	Point to 16-Point	1.4GHZ	20MHZ	-100dBm
MIMO	2x2 MIMO		10MHZ	-103dBm
POWER	23dBm±2 (2w or 10w options)		5MHZ	-104dBm
LATENCY	End to end≤30ms		3MHZ	-106dBm
MODULATION	QPSK, 16QAM, 64QAM	800MHZ	20MHZ	-100dBm
ANTI-JAM	Automatically frequency hopping		10MHZ	-103dBm
			5MHZ	-104dBm
FREQUENCY BAND			3MHZ	-106dBm
2.4Ghz	2401.5-2481.5 MHz			
1.4Ghz	1427.9-1447.9MHz			
800Mhz	806-826 MHz			

COMUART	
Electrical Level	2.85V voltage domain and compatible with 3V/3.3V level
Control Data	TTL mode
Baud rate	115200bps
Transmission Mode	Pass-through mode
Priority level	Higher priority than the network port When the signal transmission is crowded, the control data will be transmitted in priority
<p>Note:</p> <ol style="list-style-type: none">1. The data transmitting and receiving is broadcast in the network. After successful networking, each FDM-6600 node can receive serial data.2. If you want to distinguish between sending, receiving and control, you need to define the format yourself	

MECHANICAL						
TEMPERATURE	-40°C~+80°C					
DIMENSIONS	7.8*10.8*2cm					
WEIGHT	50grams					
STABILITY	MTBF≥500hr					
POWER						
Patameters	Symbol	Description	Min	Type	Max	Unit
System's Main Power Supply	VCC	Input	3.7	3.8	4.35	V
Supply Power To External Terminals	D1V8	Output		1.8		V
Supply Power To External Terminals	D2V85	Output		2.85		V
RTC Battery Power Supply	VSB	Input		3		V
INTERFACES						
RF	2 x TNC					
ETHERNET	1xEthernet					
COMUART	1xCOMUART					
POWER	DC INPUT					
INDICATOR	Tri-COLOR LED					

Robot Mobile Communication

- Drone/robot collaborative networking
- Stable/real-time/long-distance communication
- Supports Point to point/point to multi-point
- Full duplex TTL control data transmission
- hd video transmission for NLOS/LOS
